# So that safety is guaranteed in your system

0799 (System 2+)

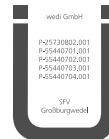

The CE labelling of the wedi products documents their tested and approved use as a sealing system for wet rooms.

Systems from wedi are labelled with the French VOC classification. A+ stands for exceptionally low emission, non-hazardous product systems.

The wedi product systems satisfy the construction guidelines and regulations that are valid in England, Wales, Northern Ireland and Scotland.

The system solutions from wedi have a wide range of differing technical building approvals and test certificates.

With the silver Architects' Darling award in 2013, wedi was honoured as one of the most popular German manufacturers in the construction sector.

The barrier-free wedi products have been tested, assessed and certified for their conformity by the DIN CERTCO organisation for conformity assessments.

When manufacturing its products, wedi uses certified green electricity from renewable energies.

The wedi construction systems are labelled with the leading Finnish emissions classification. In this context, M1 stands for the highest quality.

The Norwegian test seal, which corresponds to the European requirements, certifies the high technical quality of the wedi product systems.

The wedi quality management and the high product quality are labelled with the Finnish VTT test seal.

The MK test seal qualifies wedi products for use in Denmark in accordance with the country-specific guidelines, norms and standards.

## Building boards and finished elements

The versatility of wedi structural panels is unique. Whether a complete bathroom, individual washbasin, creative shower structure or special individual piece, ideas take shape with the structural panels from wedi. They can always be cut into your desired formats and shapes and offer waterproofness and thermal insulation in one.

### Don't forget: Matching accessories

- wedi 610 ▪ adhesive and sealant  
for waterproof adhesion of joints
- wedi Tools joint reinforcement tape ▪ to reinforce joints
- wedi Tools dowels ▪ to apply structural panels to walls

## Partition wall systems

With the modular wedi Moltromo system, a variety of wall shapes can be sensationally created for different bathroom and spa uses. Round shapes, corner and elegantly arched partition wall contours are quick and easy to fit. There are no limits to the surface design with tiles, plaster and other finishes.

## Wooden floor solutions

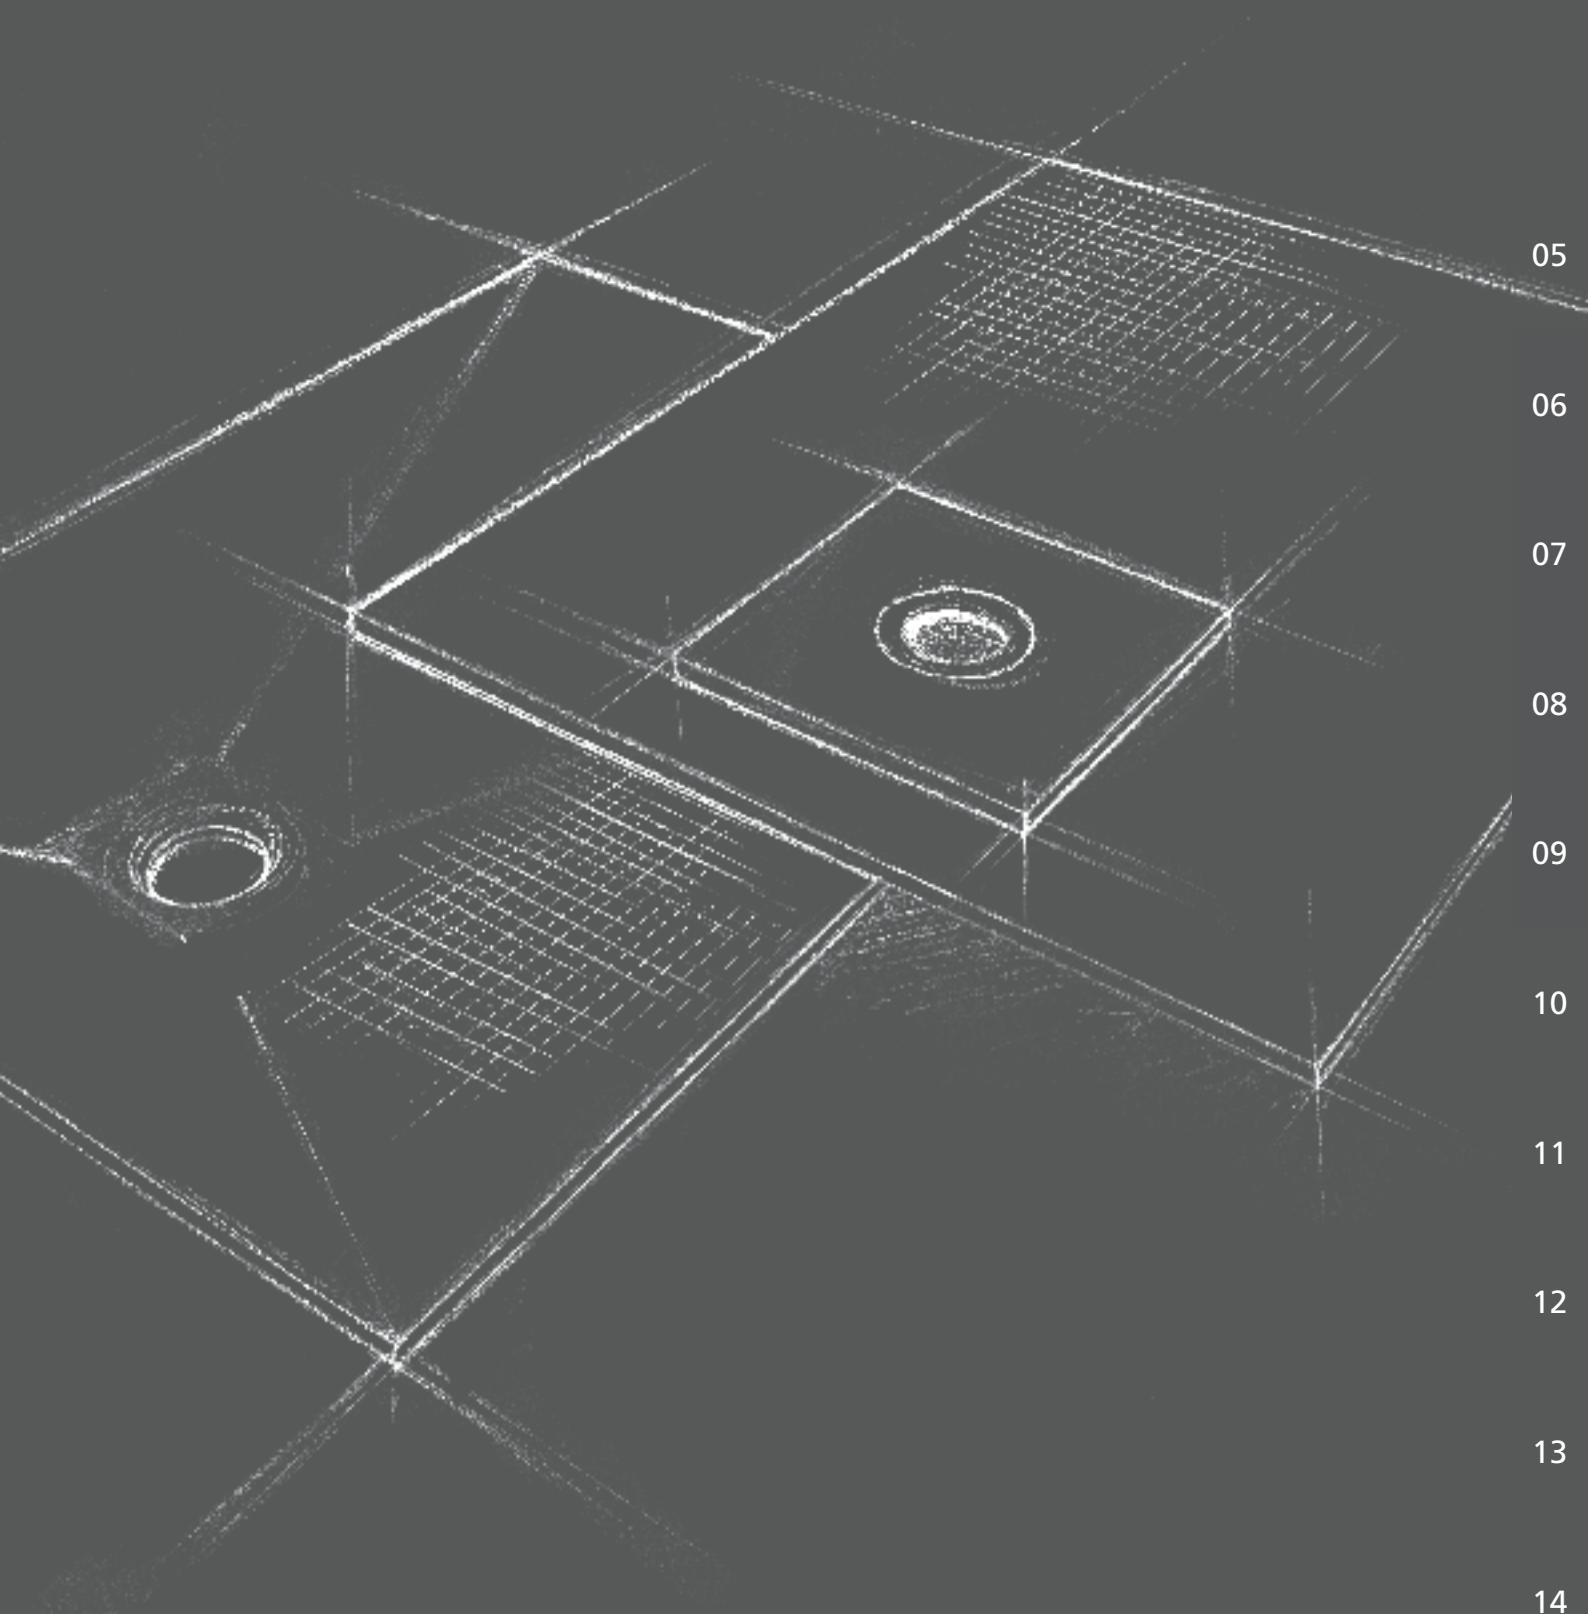

wedi has a real specialist up its sleeve for wooden floors and wooden beam ceilings. The flush-to-floor wedi Fundo Ligno shower element has been developed especially for use on wooden floor joists in old and new buildings – and it's only 20 mm thick. This means it can be integrated perfectly into existing surface layers without the need to build up additional height. Together with the Fundo sealing set, you can achieve an all-round sealed result.

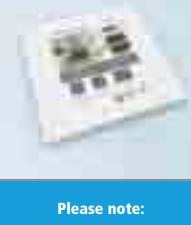

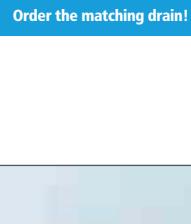

### Don't forget: Matching accessories

- wedi 610 ■ adhesive and sealant for waterproof adhesion of joints within the wedi system
- wedi Tools sealing tape ■ for watertight connection to non-system materials
- wedi Fundo sealing set ■ for all-round sealing of Fundo floor elements to adjacent materials, e.g. screed
- wedi Subliner Dry & Flex ■ crack-bridging sealing and decoupling membrane
- wedi Fundo drains ■ horizontal/vertical drains for flush-to-floor showers with point drainage
- wedi grates ■ exclusive optional grates for point drainage

## Linear drainage

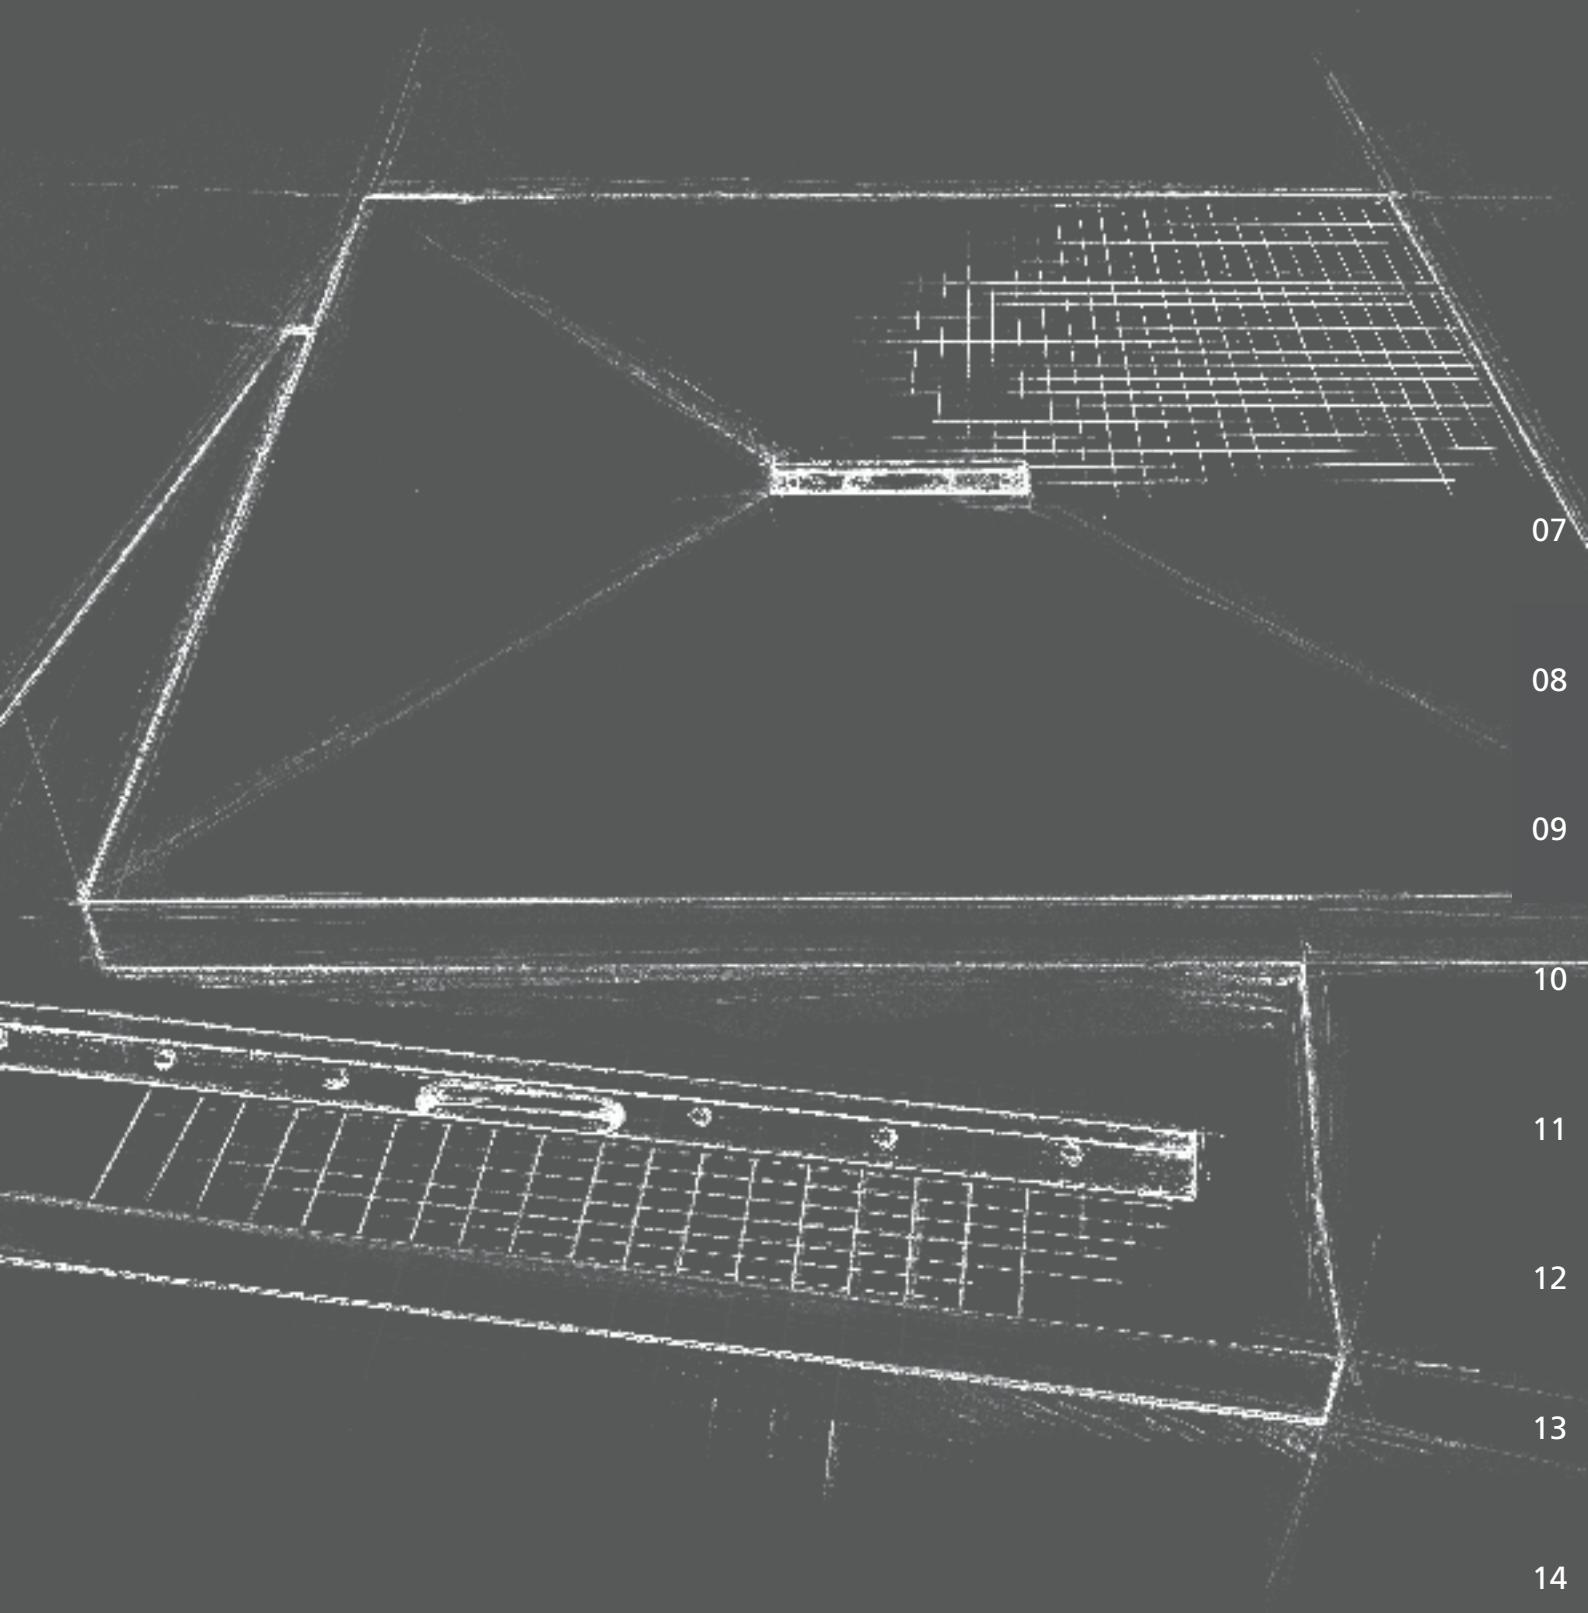

Stylish. Modern. Elegant. Showers with linear drainage are a visual highlight and have become a main criterion for the modern bathroom. wedi offers high-quality linear drainage systems, which come with either lateral or central drainage channels. The necessary slope for rapid and efficient water drainage is already integrated here. The choice of channel covers made of high-quality stainless steel complete the shower system and give your bathroom its very own character.

### Don't forget: Matching accessories

## Close-to-wall linear drainage

Flexible floor elements with close-to-wall linear drainage offer a clear advantage, alongside the elegant appearance: Large format tiles can be laid almost seamlessly. With the new wedi Fundo Riolito neo development, wedi has upped the ante once again. Height adjustment has been integrated directly into the channel cover. This allows the drain to be cleaned particularly easily. Innovation by wedi.

### Don't forget: Matching accessories

- wedi 610 ▪ adhesive and sealant for waterproof adhesion of joints within the wedi system
- wedi Tools sealing tape ▪ for watertight connection to non-system materials
- wedi Fundo sealing set ▪ for all-round sealing of Fundo floor elements to adjacent materials, e.g. screed
- wedi Fundo drains ▪ horizontal/vertical drains for flush-to-floor showers with linear drainage
- wedi channel covers ▪ High-quality channel covers for linear drainage
- wedi Fundo finish and slope profiles ▪ for an aesthetically pleasing transition to the adjoining tiled floors

## Complete systems

Floor-level showers are one of the most important customer requirements when it comes to modernising the bathroom. But the installation height is frequently restricted by local conditions, especially in existing buildings. This is why wedi developed an innovative system solution, which can be implemented irrespective of local restrictions. With the flat complete system from wedi, a floor-level shower can be reliably installed from a total assembly height of just 65 millimetres. This is because all the technical components, such as the drain, have already been integrated during production. This makes installation quicker and easier than ever.

### Don't forget: Matching accessories

- wedi 610 ▪ adhesive and sealant for waterproof adhesion of joints within the wedi system
- wedi Tools sealing tape ▪ for watertight connection to non-system materials
- wedi Fundo sealing set ▪ for all-round sealing of Fundo floor elements to adjacent materials, e.g. screed
- wedi Fundo finish and slope profiles ▪ for an aesthetically pleasing transition to the adjoining tiled floors
